IN THE MORNING

- Turn off alarm
- Get out of bed

- Eat eggs
- Drink coffee

First Euler observed that

$$1 + e^{i\pi} = 0.$$

Then, Gauss discovered the normal distribution:

$$P(x) = \frac{1}{\sigma\sqrt{2\pi}} e^{-(x-\mu)^2/2\sigma^2}$$

Finally, Einstein proclaimed:

$$E = mC^2$$

At the end, Ioannidis concluded that most published research findings are false
